

LD 500/510 leak detector with camera – indicates leakage rate in l/min and costs in €

The LD 500 meets the requirements of Class I „Standard Test Method for Leaks with ultrasound“ (ASTM Int. - E1002-5)

Find out your leak rate (l/min) and potential saving (€/year)

Find the smallest leaks in far distance

Auto level: adapts the sensitivity automatically to the environment and eliminates the ambient noise reliably

Photograph leaking parts

Describe the leak and necessary actions

Transmit the leak details via USB to your desktop software

Create an ISO 50001 report

Seek the leak the whole day (9 hours)

Table: Leakage costs within one year in case of operation 24 h/365 days, calculated with compressed air costs of 1.9 ct/Nm³.

Leakage

LD 500/510 is a consistent advancement

The new leak meters LD 500/510 with integrated camera and leakage calculation are ideal measuring instruments which help to find and document even smallest leakages (0.1 l/min corresponds to approx. 1 € per year) easily even in far distances.

LD 510 is the worldwide first leak meter with an additional freely assignable sensor input for all CS sensors. In addition to the leakage measurement and detection also all necessary measurements with regards to dew point, flow, pressure, and temperature ... can be carried out.

Leak detection at:

- Compressed air, gas, steam and vacuum systems
- Steam Traps
- Seals
- Refrigeration systems

The noise-proof headset enables the leak detection also in EXTREMELY loud ambient. The ambient noise will be faded out, the leakage (inaudible ultrasonic sound) will be transformed to an audible signal. The laser grants an exact locating.

Accessories

Acoustic trumpet

bundles the acoustic waves of smallest leakages, disturbing ambient noise will be eliminated

Focus tube with focus tip

for precise locating of smallest leakages in narrow areas

Optionally available:

Gooseneck enables a positioning of the leakage on the spot – even in case of hardly accessible locations.

Parabolic mirror:

for leak detection at long distances.

Leakage files stored in LD 500 are exported to a USB stick for issuing a report by software

Leak Tags in hardcopies for documentation on-site

If the leakage is found and stored the following data are also stored in the LD 500 and will be available after the export in the CS Leak Reporter software for issuing a report:

- Photo of the leakage point
- Date / time
- Company name / department / machine
- Size of the leakage in liters/min (unit selectable)
- Costs of the leakage per year in € (currency selectable)

Detailed reports can be issued via PC software, which can be placed at the disposal of the operators of compressed air systems resp. the head of the respective department.

The report can be issued for the whole company or for each department and it documents the detected leakages easily and clearly. Due to the summation at the end of the report it is easy to get an overview on the whole leakage amount in liters/min as well as the total leakage costs per year.
